

INTRODUCING THE NEW BRD VELOCITY v1-250 MOTION SYSTEM

BRD Velocity V1-250 + BRD Sim Cell

*"realistic motorsport simulation
 has never been so affordable!"*

*"utilising BRD's award winning
 technology"*

*"ideal for Promotional Activities,
 Shows, Events & Driver
 Training"*

This new system has all the technology, expertise and adrenalin-surgin excitement of our award winning motion system the Velocity V1-500, but on a more compact scale.

- State of the art features and specifications for the most advanced racing experience.
- Designed for ease of transportation, it can easily fit into the back of a 'Transit' van for use at the track or a show.
- Only requires 'single phase' electricity; therefore, any normal plug socket will do.
